

## UNIVERGE® SV8000 Series PC Pro

Fulfilling the promise of UNIVERGE®360

The UNIVERGE® SV8000 Series PC Pro is an instrumental troubleshooting tool that empowers your system administrators to manage the communication server and provides them with the functionality needed to simplify communications.

### At a Glance

- Program using Standard View, Wizards or System Data
- Provides modification history reports
- Schedules SV8000 Series system updates automatically and remotely

PC Pro helps you manage your communication server simply and easily. Most PC Pro programming is done via three views – Standard, Wizards and System Data. These views are accessible through menu items, a tabbed view or one-click icons.

### *Program using Standard View, Wizards or System Data*

SV8000 Series PC Pro provides you with multiple user interface options including a Standard View, Wizards, and a System Data view.

Standard View combines related settings on one screen, allowing quick setup of high-level tasks. Settings on these screens work together to provide users a better understanding of screen relationships. Standard screens are identified by name which clearly indicates their function.

Another option is to use Wizards to simplify programming. PC Pro wizards chronologically group System Data and guide users during feature setup. Wizards are named according to their function.

System Data screens are intended for advanced users of PC Pro and are categorized by communication server settings.

### *Modification history*

PC Pro keeps a record of all modifications made to a database file. This record is the file's Modification history. Users are able to easily view this Modification history file and can quickly see any changes that have been implemented.

Empowered by Innovation

**NEC**

### Automatic and remote functions

Users can also schedule automatic updates to SV8000 Series firmware remotely. Additionally, settings between systems and PC Pro can be remotely uploaded and downloaded. This facilitates the management process.

### Additional features

PC Pro also offers additional features. For example, users can capture low-level messages and problem solve, using the Debug Terminal. Users can also generate reports for monitoring settings and archive those settings to specified files. PC Pro provides you with the information, tools, and flexibility to efficiently manage your terminals and simplify communications.

### System requirements

<b>CPU</b>	Pentium 4, 1.7 GHz (minimum) Dual core processor (recommended)
<b>Memory</b>	512 MB RAM 2 GB (recommended)
<b>OS</b>	Microsoft Windows 2000, Microsoft Windows XP, or Microsoft Vista
<b>Other</b>	Microsoft Internet Explorer 6.0 or higher
<b>Communication Port</b>	LAN or Modem
<b>Disk space</b>	100 MB (recommended)
<b>TCP port</b>	TCP port 8000 must be open between the terminal and the host PC for uploading/downloading via LAN.

UNIVERGE®360 is NEC's approach to unifying business communications. It places people at the center of communications and delivers on an organization's needs by uniting infrastructure, communications and business.

**About NEC Corporation:** NEC Corporation (NASDAQ: NIPNY) is one of the world's leading providers of Internet, broadband network and enterprise business solutions dedicated to meeting the specialized needs of its diverse and global base of customers.
